MECHA COLOR

WATERBASED ACRYLIC AIRBRUSH COLORS

Mecha Color, a new range of acrylic airbrush colors, has been designed especially for painting robots, Gundam, Transformer and Gunplas figures. The innovative formulation of the colors, although water-based, guarantees a maximum resistance to manipulation, impacts, friction, scratches and overall extreme wear. Once dry, the color appears the same as the injected plastic color, respecting all the details of the kit.

Mecha Color es una gama de colores acrílicos satinados para aerografía, formulados para pintar todo tipo de robots, gundam, transformers, gunplas, etc. Su innovadora formulación, con base agua, garantiza al modelista una máxima resistencia a manipulados, impactos, roces, arañazos, etc. Una vez seco su aspecto recuerda al del mismo plástico inyectado respetando el detalle más diminuto presente en el modelo
